REASONS FOR ALLOWANCE

1. Claims 77 and 91 are allowed.
2. The following is an examiner's statement of reasons for allowance: Hunter et al. (US 2003/0069002) discloses the use of generating a hierarchical representation of a multi-floored building, generating occupant nodes, where each occupant is associated with a device, and contacting the occupant during an emergency event, Young et al. (US 2004/0168086) discloses a hierarchical breakdown of a building, from floor to area to resource for emergency events. However, both Hunter and Young fail to disclose receiving evacuation information from a contacted occupant relating to the area of the floor the occupant is located, and using the received evacuation information in contacting other occupants. Therefore a method (as well as a program storage device, tangibly embodying a program of instructions executable by a machine to perform the method) of managing a plurality of occupants during an emergency event which generates a hierarchical representations of a multi-floored building, generates and occupant node and device mode for each occupants, contacts each occupants when an emergency event occurs, receives evacuation information from a contacted occupant and using the information received to contact other occupants, is not anticipated nor rendered obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
